

WEEK 2: GROUP SLIDES/ARTICLE

TECHNOLOGY
STUDENT
ASSOCIATION

HOMEWORK TIME!

DUE DATE: Next meeting? IDK we'll discuss it :)

TASK: There are three interest groups that we've created based on the survey: game development, (competitive) programming, and cybersecurity. Your task is to make either an **ARTICLE** or **PRESENTATION** to learn more about the vast world in each.

BOTH articles and presentations will be uploaded to the website, <https://htpatsa.com/>, at [/archives](#) and [/presentations](#) respectively.

Form groups of **TWO** and decide on your topic (preferably any of the three mentioned above, but feel free to pick anything else!)

ROUTE 1: ARTICLE (PREFERRED)

- **FOUR SECTIONS:**

1. What does your competition **INVOLVE**?
2. What necessary **SKILLS** are needed within this interest group or competition? (be specific!)
3. What **COMPETITIONS** are offered? How are these competitions structured? (be specific!)
4. What kind of **RESOURCES** are available? (links!)

- **MUST BE IN MARKDOWN FORMAT! LEARN!**

- Markdown is a type of "markup language" which is used to format 99% of articles on the internet. It's really simple.
- To learn more, visit <https://www.markdownguide.org/>.
- NEEDS IMAGES AND SOURCES!

ROUTE 2: PRESENTATIONS (ALTERNATE)

- FOUR SLIDES:
 1. What does your competition **INVOLVE**?
 2. What necessary **SKILLS** are needed within this interest group or competition? (be specific!)
 3. What **COMPETITIONS** are offered? How are these competitions structured? (be specific!)
 4. What kind of **RESOURCES** are available? (links!)
- IMAGES AND SOURCES FOR EACH SLIDE
- SLIDE MAKERS MIGHT NEED TO PRESENT
